How to Upload Books to Amazon

Here are the 3 freebies I made so you can easily start uploading blank notebooks TODAY:

Editable book cover: https://censoredshop.com/cover
100 page lined interior file: https://censoredshop.com/interior
Uploading checklist: https://censoredshop.com/kdpchecklist

BONUS:
1. Facts book style editable cover template
2. Non-fiction style editable book cover template

1

Coloring Books for EZ Profits
Coloring books are easier to make than you'd think. Its a huge market of repeat buyers, and you can make profit at $3.99 (including prime shipping!) Canva has plenty of free graphics (and you don't need Canva Pro.) Creative Fabrica (affiliate link) is worth it for coloring book mandala graphics alone.

2

Keyword Research
To see popular search terms, type ideas into the search bar on Amazon and see what pops up. Use the free Chrome app Amz Suggestion Expander to see more. You may find good keywords to use by selecting 'new releases' on search result pages, and investigating the best selling ones.

3

Automation Software
Automation software is even better for KDP than merch. If you upload books manually, you spend a lot of time waiting for files to process. You'll quickly get sick of it--but you can use software to automate bulk-uploading: Flying Research affiliate link - Merch Titans aff. link

How to Make Your Own Book Covers & Interiors
The size of book cover files depends on the number of pages & size of the book. The included free cover designs are for 6x9" 100 page notebooks.

To figure out the design size you need for other book types go to www.kdp.amazon.com/cover-calculator - Then, for free on Canva.com create a custom size design with those dimensions.

To write a book or publish fact books like ours, you can create book interiors on Google Docs (go to www.docs.new for a shortcut to creating a new document.) Then, download the extension Page Sizer, so you can resize the document for whatever size book you want to make, eg 6x9"
